

SOLTERRA

Experience Electrifying Enjoyment

Built to handle both daily routines and weekend adventures, the SUBARU SOLTERRA delivers powerful acceleration from front and rear motors, AWD capability for rough roads, and advanced safety features for peace of mind—bringing more smiles to your family and greater enjoyment to every drive.

Drive Electric, Drive Confident

Feel seamless, powerful acceleration from the moment you press the pedal. The SOLTERRA's low-centre of gravity, built on decades of SUBARU's engineering excellence, delivers smooth, stable handling. Combined with an improved AWD system, it ensures confidence on any terrain. Experience EV innovation fused with the SUBARU difference.

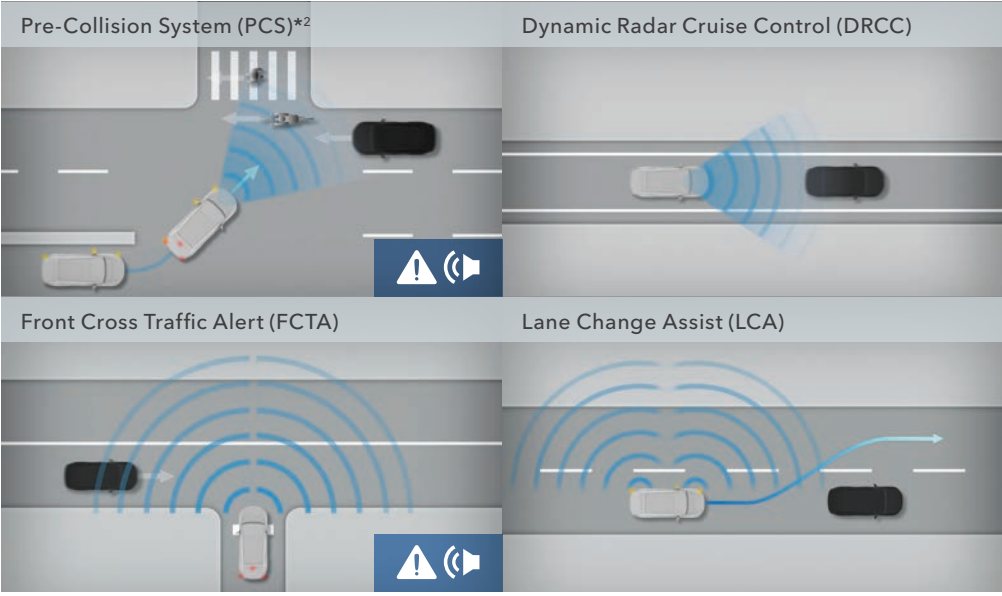

Paddle Switches
Regenerative braking levels can be easily adjusted to match your driving scenario. The strongest of the five regenerative braking levels lets you accelerate and decelerate using just the accelerator pedal, making city driving smoother and more convenient.

All-Around Safety You Can Trust

For decades, SUBARU has relentlessly tested and refined advanced safety systems to protect what matters most. The SOLTERRA embodies this commitment, featuring SUBARU Safety Sense*1 for collision prevention and avoidance, alongside the updated e-SUBARU GLOBAL PLATFORM for enhanced protection. Every innovation brings us closer to an accident-free future.

SUBARU Safety Sense

SUBARU Safety Features

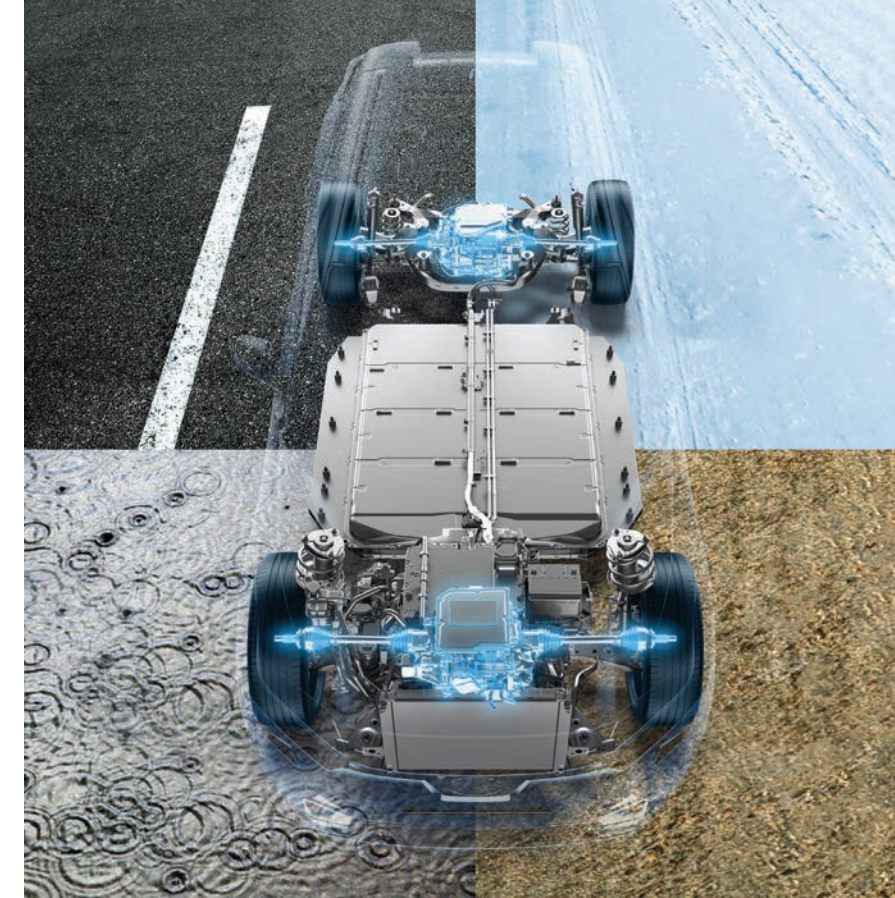

Safe Exit Assist (SEA)
When stationary, the rear radar detects vehicles or bicycles approaching from behind and alerts occupants to potential collisions with visual warnings. If a door is then opened, a buzzer sounds to raise the alarm level.

Parking Support Brake (PKSB)
A camera detects the presence of pedestrians in SOLTERRA's path when reversing and warns the driver with an audio alert. If the system judges a collision is about to happen, it automatically applies the brakes to avoid or reduce injuries or damage.

For illustration purposes only. Not to scale.
*1 SUBARU Safety Sense is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of surroundings and traffic regulations. System effectiveness depends on many factors such as weather, road and vehicle conditions. See Owner's Manual for complete details on system operation and limitations for SUBARU Safety Sense including functions in this brochure.
*2 Pre-Collision System may not work in all situations. Depending on the speed difference from objects, the object's height, and other conditions, every situation may not meet the necessary conditions for SUBARU Safety Sense to work optimally.

Uncompromised Performance

SUBARU has incorporated its expertise into a front-and-rear independent motor-driven AWD system, paired with X-MODE to enhance rough-road capability. By harnessing the quick, precise control of electric motors, the system delivers exceptional stability and performance, enabling SUBARU SUVs to tackle diverse driving conditions with confidence.

AWD System

SUBARU's AWD expertise is now in an EV, with eAxle motors at the front and rear enabling precise power distribution and brake vectoring to optimise grip for every wheel. The driver can now better grasp the ever-changing road and vehicle conditions, making it easier to maintain control. This provides greater peace of mind than ever before.

X-MODE

X-MODE enables SOLTERRA to drive through the toughest conditions, from deep snow to muddy trails, delivering exceptional rough-road performance. For added confidence, the Panoramic View Monitor provides visual support, helping drivers navigate challenging terrain and detect obstacles when parking.

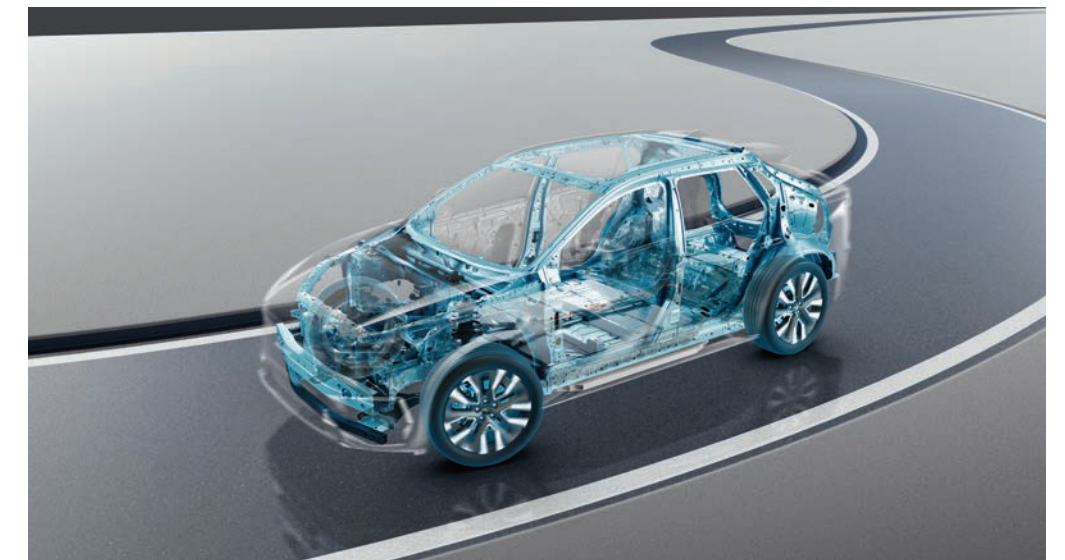

e-SUBARU GLOBAL PLATFORM

The e-SUBARU GLOBAL PLATFORM, a dedicated platform newly developed for SUBARU BEVs, has been further enhanced. The high-capacity battery is located under the floor, lowering the centre of gravity to improve handling and maximise cabin space. Its innovative design merges the battery case with the body frame, forming a monolithic structure for improved rigidity.

Power Unit (Motor/Battery)

The powertrain unit has been completely revamped, alongside an increase in battery pack capacity. The front and rear axles deliver instant torque for rapid response and linear acceleration. A powerful 167 kW motor drives the front axle, while a water-cooled system regulates battery temperature to ensure consistent performance.

Road Clearance

SOLTERRA is a genuine SUV with the ground clearance needed to go rough-road. In addition, approach, departure and breakover angles are calculated to protect the body and battery.

Comfort Wherever You Go

A spacious, comfortable interior ensures relaxation for all passengers, enhanced by thoughtful features that make every moment spent inside more enjoyable. Designed for families, the interior fosters lively conversations and shared experiences inside the vehicle.

Driving Starts Here

SOLTERRA's cockpit embodies SUBARU's core design principles: Visibility, Simplicity, and Ease-of-use. A clean, horizontal shape creates a spacious, open interior, while essential driving information is intuitively displayed on a low-mounted instrument panel and high-visibility console.

LCD Meter

The top-mounted seven-inch TFT LCD meter features an advanced hoodless design. Positioned above the oval steering wheel, its layout minimises eye movement helping the driver to stay focused on the road.

14-inch Centre Display

The large centre display offers high visibility and minimal reflectivity for readability. Its intuitive touch panel ensures effortless operation, allowing users to access information comfortably and safely.

Wireless Charger

A wireless charger for two smartphones, compatible with the Qi standard.

Premium Harman/Kardon Audio

Six front and four rear speakers plus woofer, specifically tuned for SOLTERRA, provide high quality sound for all passengers.

USB C Ports

Two USB C ports, one at the front and one at the rear, allow convenient charging of smartphones and tablets etc., from anywhere in the vehicle.

Steering Heater

The entire steering wheel is heated for a warm grip in any position. Auto ON and multi-stage temperature control add convenience.

Room to Relax

SOLTERRA's spacious cabin offers relaxing comfort giving everyone, especially rear-seat passengers, the room to stretch out and enjoy the journey. Better still, the quiet EV performance encourages everyone to join in the conversation.

Panoramic Roof

The panoramic roof enhances the sense of spaciousness, offering an expansive view of the sky that stretches across the entire upper surface. A powered blind blocks glare and heat of direct sunlight.

Utility for Any Journey

SOLTERRA is a SUBARU, and it fully inherits SUBARU's unique utility. For example, the large opening cargo area features a flat floor for convenient loading/unloading of bulky items making the vehicle versatile and supremely suited to a wide variety of activities.

Hands-free Power Back Door

Simply move your foot under the rear bumper to open or close the back door—perfect for times when your hands are occupied, like carrying groceries or luggage.

V2L

The luggage compartment includes a 220 V / 1500 W power outlet, perfect for camping, powering tools, or staying prepared during unexpected situations like power outages.

Charged for the Challenges Ahead

The e-SUBARU GLOBAL PLATFORM has been completely revamped to deliver next-level performance. With improved battery capacity, smarter battery management, and advanced energy efficiency optimisation for the front and rear motors, driving range has been significantly extended. These innovations ensure greater peace of mind, empowering you to explore farther than ever before.

Battery

The SOLTERRA features a high-capacity lithium-ion battery with a water-cooled system to maintain optimal temperature. It delivers steady performance, even in challenging conditions like extreme weather, high-speed driving, or rapid charging—ensuring reliability and confidence on every drive.

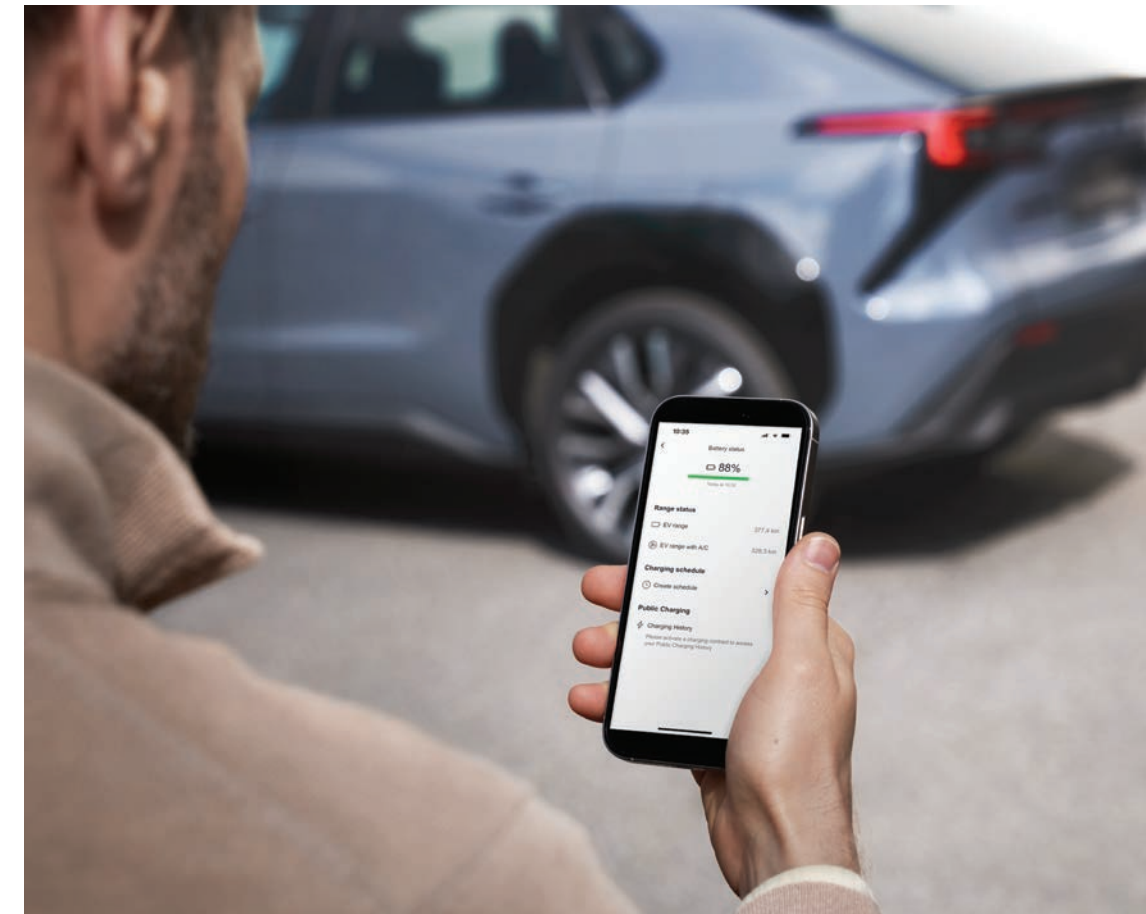

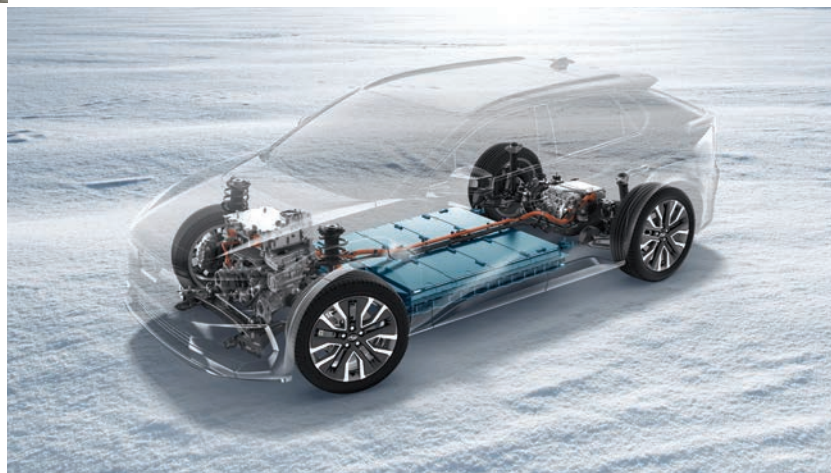

Charging

The SOLTERRA is designed for convenience, with extended range and compatibility with fast charging worldwide. 150 kW DC quick charging powers the battery to 80% in just 28 minutes*. An upgraded 22 kW AC charger speeds up standard charging, while a smartphone app enables remote charge monitoring.

Charging Performance at Low Temperatures

The battery heater ensures reliable performance and faster charging in low-temperature conditions. Additionally, if you set a charging station as your destination in the navigation system, the preheat function warms the battery before arrival, significantly reducing charging time—even at temperatures as low as -10°C.

*Charge times can vary depending on many factors, including temperature, and condition of the vehicle and battery.

Stay Connected

Connected to the vehicle and the in-car multimedia system, the SUBARU Care mobile app is your passport to a new level of connectivity and convenience. Available through your smartphone, it enables you to remotely access and control a whole range of information and functions, keeping you connected with your SOLTERRA—even when you're not in it.

For more information, visit www.subaru.eu/connected-services

eCall

The system automatically notifies the eCall centre if the airbags deploy and relays location, time and VIN to the operator to assist in the dispatch of emergency vehicles. Manual operation is also available.

SUBARU Care Features

Remote Services

Remotely manage climate control, check the battery status or manage the charging schedule.

SUBARU CHARGING NETWORK

Locate charging points across Europe to plan your journeys with peace of mind, and unlock the charging points easily via the SUBARU Care app or RFID card.

Find My Car

Locate your SOLTERRA wherever you parked it.

Car Status

Remotely check if the doors are securely locked, and lock them if they're open.

Alerts

Be notified of any warning events occurring to your SOLTERRA or consult information about warning lights any time.

EV Routing

Plan your route and get suggestions on where you can charge your SOLTERRA to arrive at your destination stress-free.

Services and applications require a compatible mobile phone and a data plan with a mobile network operator that permits tethering. Availability of each service depends on country. Please inquire at your local retailer for details.

SOLTERRA High / Mid

DIMENSIONS L x W x H: 4690 x 1860 x 1650 mm
FRONT MOTOR
TYPE Permanent magnet synchronous motor
