

SUBARU

| UNCHARTED

Adventure Awaits, Electrified

Introducing the UNCHARTED—a compact BEV that turns your everyday errands into adventures and transforms ordinary outings into pure driving joy. Despite its sleek body, the UNCHARTED is packed with numerous comfort features and advanced safety technologies for your convenience. With FWD and AWD options, you can find the perfect fit for your lifestyle and unlock new possibilities, anytime and anywhere.

Battery

The UNCHARTED features a high-capacity lithium-ion battery with a water-cooled system to maintain optimal temperature. It delivers steady performance, even in challenging conditions like extreme weather, high-speed driving, or rapid charging—ensuring reliability and confidence on every drive.

Charging

The UNCHARTED is designed for convenience, offering ample range and compatibility with fast charging worldwide. 150 kW DC quick charging powers the battery to 80% in just 28 minutes*. For standard charging, a 22 kW AC charger is also available, while a smartphone app enables remote charge monitoring.

* Charge times can vary depending on many factors, including temperature, and condition of the vehicle and battery.

Charging Performance at Low Temperatures

The battery heater ensures reliable performance and faster charging in low-temperature conditions. Additionally, if you set a charging station as your destination in the navigation system, the preheat function warms the battery before arrival, significantly reducing charging time—even at temperatures as low as -10°C.

Charged for Performance

Powerful and seamless acceleration unique to BEVs, delivered the moment you step on the accelerator. The compact and lightweight design delivers nimble manoeuvrability, while its low centre of gravity layout ensures a smooth and stable ride. This is SUBARU's latest offering, crafted to deliver its signature fun-to-drive experience.

Paddle Switches

Regenerative braking levels can be easily adjusted to match your driving scenario. The strongest of the five regenerative braking levels lets you accelerate and decelerate using just the accelerator pedal, making city driving smoother and more convenient.

AWD System

SUBARU's AWD expertise is now in an EV, with eAxle motors at the front and rear enabling precise power distribution and brake vectoring to optimise grip for every wheel. The driver can now better grasp the ever-changing road and vehicle conditions, making it easier to maintain control. This provides greater peace of mind than ever before.

e-SUBARU GLOBAL PLATFORM

The UNCHARTED leverages the e-SUBARU GLOBAL PLATFORM, a dedicated platform that has been newly developed for SUBARU BEVs. The high-capacity battery is located under the floor, lowering the centre of gravity to improve handling and maximise cabin space. Its innovative design merges the battery case with the body frame, forming a monolithic structure for improved rigidity.

Power Unit (Motor/Battery)

The compact and highly efficient eAxle power unit generates torque instantaneously, delivering rapid response and linear acceleration. A powerful 167 kW* motor drives the front axle, while a water-cooled system regulates battery temperature to ensure consistent performance.

* Some FWD models are equipped with a 124 kW motor.

Built to Explore

SUBARU has incorporated its expertise into a front-and-rear independent motor-driven AWD system, paired with X-MODE to enhance rough-road capability. By harnessing the quick, precise control of electric motors, the system delivers exceptional stability and performance, enabling SUBARU SUVs to tackle diverse driving conditions with confidence.

Road Clearance

The UNCHARTED is equipped with the ground clearance needed to go rough-road. In addition, approach, departure and breakover angles are calculated to protect the body and battery.

X-MODE

X-MODE enables the UNCHARTED to drive through the toughest conditions, from deep snow to muddy trails, delivering exceptional rough-road performance*. For added confidence, the Panoramic View Monitor provides visual support, helping drivers navigate challenging terrain and detect obstacles when parking.

* Available only on AWD models.

Your Journey Starts Here

The UNCHARTED's cockpit embodies SUBARU's core design principles: Visibility, Simplicity, and Ease-of-use. A clean, horizontal shape creates a spacious, open interior, while essential driving information is intuitively displayed on a low-mounted instrument panel and high-visibility console.

LCD Meter

The top-mounted seven-inch TFT LCD meter features an advanced hoodless design. Positioned above the oval steering wheel, its layout minimises eye movement helping the driver to stay focused on the road.

Rotary Shifter

Combining intuitive operation with a sleek, modern design, the rotary shifter features a one-touch switch for quick transitions to 'P,' ensuring ease of use.

Cabin Comfort Redefined

The interior seamlessly blends comfort and stylish design, with thoughtful features that elevate every moment inside. The exceptional quietness unique to BEVs enhances the cabin experience, fostering engaging conversations and shared enjoyment on every journey.

14-inch Centre Display

The large centre display offers high visibility and minimal reflectivity for readability. Its intuitive touch panel ensures effortless operation, allowing users to access information comfortably and safely.

Wireless Charger

A wireless charger for two smartphones, compatible with the Qi standard.
* Qi wireless charging may not be compatible with all mobile phones.

Premium Harman/Kardon Audio

Six front and four rear speakers plus woofer, specifically tuned for the UNCHARTED, provide high quality sound for all passengers.

USB C Ports

Two USB C ports, one at the front and one at the rear, allow convenient charging of smartphones and tablets etc., from anywhere in the vehicle.

Space to Stretch

The UNCHARTED combines a sleek, sloping rear design with the practicality of an SUV. A flat rear floor and sufficient head clearance create an open, spacious cabin, letting you stretch out and travel comfortably.

Panoramic Roof

The panoramic roof enhances the sense of spaciousness, offering an expansive view of the sky that stretches across the entire upper surface. A powered blind blocks glare and heat of direct sunlight.

Seat Heaters

With three adjustable temperature settings, the seat heaters warm key areas like the middle of the back and thighs, keeping you cozy and comfortable even on chilly days.

Compact Yet Capable

Despite its compact size, the UNCHARTED boasts a spacious luggage compartment with thoughtful design features. A wide opening makes loading effortless, making it perfect for everything from daily shopping to carrying hobby gear.

Power Back Door

The power back door allows easy opening and closing with the push of a button, while its adjustable opening angle ensures added convenience tailored to your needs.

Deck Board

The practical deck board allows you to adjust the luggage floor height to two levels—upper for easier loading and unloading, or lower to expand cargo space for larger items.

All-Around Safety You Can Trust

For decades, SUBARU has relentlessly tested and refined advanced safety systems to protect what matters most. The UNCHARTED embodies this commitment, featuring SUBARU Safety Sense*¹ for collision prevention and avoidance, alongside the updated e-SUBARU GLOBAL PLATFORM for enhanced protection. Every innovation brings us closer to an accident-free future.

SUBARU Safety Sense

For illustration purposes only. Not to scale.

*¹ SUBARU Safety Sense is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of surroundings and traffic regulations. System effectiveness depends on many factors such as weather, road and vehicle conditions. See Owner's Manual for complete details on system operation and limitations for SUBARU Safety Sense including functions in this brochure.

*² Pre-Collision System may not work in all situations. Depending on the speed difference from objects, the object's height, and other conditions, every situation may not meet the necessary conditions for SUBARU Safety Sense to work optimally.

SUBARU Safety Features

Safe Exit Assist (SEA)

When stationary, the rear radar detects vehicles or bicycles approaching from behind and alerts occupants to potential collisions with visual warnings. If a door is then opened, a buzzer sounds to raise the alarm level.

Parking Support Brake (PKSB)

A camera detects the presence of pedestrians in the UNCHARTED's path when reversing and warns the driver with an audio alert. If the system judges a collision is about to happen, it automatically applies the brakes to avoid or reduce injuries or damage.

Stay Connected

Connected to the vehicle and the in-car multimedia system, the SUBARU Care mobile app is your passport to a new level of connectivity and convenience. Available through your smartphone, it enables you to remotely access and control a whole range of information and functions, keeping you connected with your UNCHARTED—even when you're not in it.

For more information, visit www.subaru.eu/connected-services

Send to Car

Plan your journey directly from your phone and send it to your navigation system. Let the car take care of planning your charging stops including battery preconditioning to improve charging efficiency.

SUBARU Care Features

Remote Services

Remotely manage climate control, check the battery status or manage the charging schedule.

Find My Car

Locate your UNCHARTED wherever you parked it.

Car Status

Remotely check if the doors are securely locked, and lock them if they're open.

Alerts

Be notified of any warning events occurring to your UNCHARTED or consult information about warning lights any time.

SUBARU CHARGING NETWORK

Get access to more than 900,000 charging points across Europe, unlock them easily via the SUBARU Care app or RFID card. View your complete charging history and get billed on a monthly basis.

eCall

The system automatically notifies the eCall centre if the airbags deploy and relays location, time and VIN to the operator to assist in the dispatch of emergency vehicles. Manual operation is also available.

Services and applications require a compatible mobile phone and a data plan with a mobile network operator that permits tethering. Availability of each service depends on country. Please inquire at your local retailer for details.
